REMARKS 44

25X1X

SOURCE

1. a. Most of the bomb craters on the runways of the LAERZ (N 54/U 33) airfield were filled by late June 1949. It was rumored that the field was to be occupied by jet-fighters.

b. The MIROW (N 54/U 33) - RECHLIN (N 54/U 33) RR line which had been used for the transportation of building material required for the construction of the runway, was scheduled to be opened to normal traffic by 1 July 1949.

c. Two trucks, hauling round timber from the MIROW RR station to RECHLIN,  

25X1C

2.   Comment:

a. Another source confirmed repair work at the runway of the LAERZ airfield and also observed the motor vehicle   at the field.

25X1C

b. Other sources have reported repair work at the runway of the LAERZ airfield since March 1949. On 17 June 1949 it was stated that the construction work was completed. The landing field and the runways of the LAERZ airfield are assumed to again be serviceable. So far the field has not been occupied by an air unit. This is the first information on an intended occupation by jet fighters. The reported motor vehicle   are apparently not assigned to an air unit but probably to ground units of the two component fighter corps of the sixteenth Air Army.   were previously observed in JUSTERBOG, PALLERBERG, MITTSTOCK and FALKENSEE.
